

SOLUTION

OMNE messengerPOLICY® allows you to control the use of IM. It brings together several resources to prevent recreational use and damage to the company's security, integrity and confidentiality of data. After installation, all messages exchanged will be analyzed by OMNE messengerPOLICY® and treated according to the policies defined by the administrator.

RESOURCES

- Monitors the use of *MSN*® in real time(message exchanges, file transfer, voice, video conference, etc.)
- Detects and/or locks the use of instant messengers that doesn't follow the *MSN*® pattern - including the Skype® (beta)
- Imports automatically the contact's list of all users connected to the messengerPOLICY®
- Use policies by user, groups, schedules and resources
- Standardizes and customizes the user's personal messages
- Customized monitoring notification, such as: "this conversation in being monitored by messengerPOLICY®"
- Blocks encrypted messages (resource compactible with the Gaim-Encryption and Simp Lite)
- Runs in Bridge mode, i.e. maximum simplicity to enter the messengerPOLICY® in its computational structure
- Prevents the exchange of messages with users who have not verified email address by *Microsoft*®
- Filter key-words (including URLs) to prevent the exchange of improper messages to harmful sites
- History of messages, many options of consultations, charts and reports to measure how *MSN*® is being used
- Integrity of the information on the reports
- Administration Web Interface
- High Availability Active/Stand by and/or Active/Active
- Support with qualified and certified professionals that ensure high level services*

* Supplementary optional service

RULE SAMPLE

With OMNE messengerPOLICY®, the administrator can create various types of rules, for example, one that restricts the exchange of messages only to the company's internal environment, see the example below:

["JOHN" (OBJECT-USER) CAN TALK WITH
"INTERNAL TEAM" (OBJECT-GROUP) RESPECTING
THE "BUSINESS HOURS" (OBJECT-TIME TABLE)]

**Don't let your company be a target of malware,
be protected with OMNE messengerPOLICY®. Learn more on <http://www.brc.com.br>**
